

## **Artificial Trans Fat Policy Statement**

Trans fats can occur naturally in a variety of ingredients and therefore Compass Group cannot guarantee our recipes are Trans Fat free. We work with our suppliers to remove the presence of Artificial Trans Fats from our products by ensuring they do not contain any partially hydrogenated vegetable oils. Products containing a fully hydrogenated vegetable oil with a Trans Fat level of less than 2% meets the terms of the Governments Responsibility Deal Trans Fat Pledge that Compass Group have signed up to.

It is our policy that we do not purchase any raw or composite ingredients made from or containing partially hydrogenated vegetable oil and ensure that those containing fully hydrogenated vegetable oil contain no more than the maximum level permitted.

To achieve this, product specifications are obtained from suppliers for every product and signed off by the nutrition team before being utilised within the business.
