

Terminal Server Setup for Students

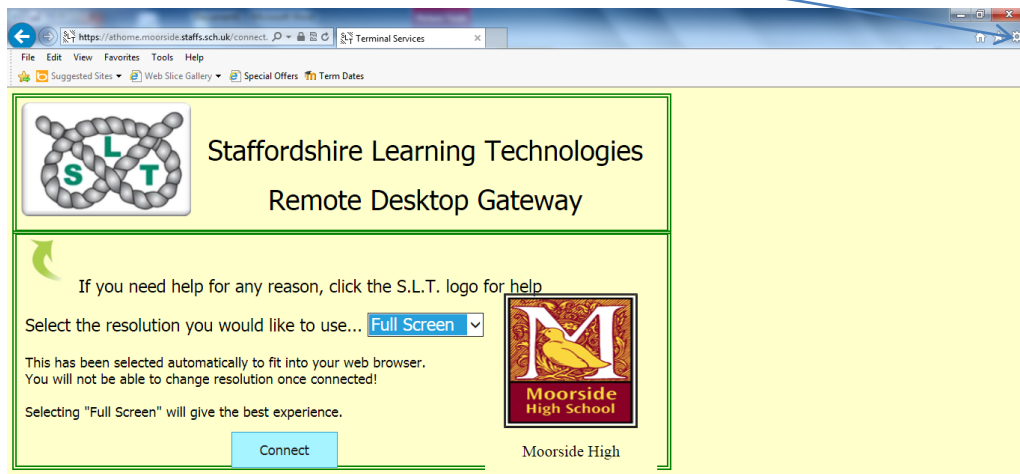

Remote desktop is a way of controlling a computer from a remote location. Using the S.L.T Remote Desktop Solution. You can log onto your school's network from a laptop within the school, from home or from a PC in a feeder school. The beauty of this system is that it doesn't need a spare "real" computer in your school, you log onto a server that creates a virtual computer for you. **Remember:** you are using a virtual computer.....**be patient!**

To access the Terminal Server enter the following address into Internet explorer

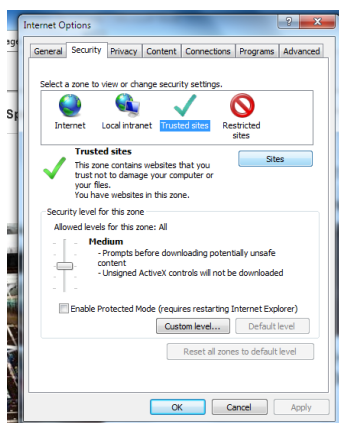

<https://athome.moorside.staffs.sch.uk>

This address needs to be added to your Trusted Sites in your web browser.

Open Internet options by clicking on the cog wheel and choose Internet Options.

Choose the Security Tab, click on Trusted Sites then Sites

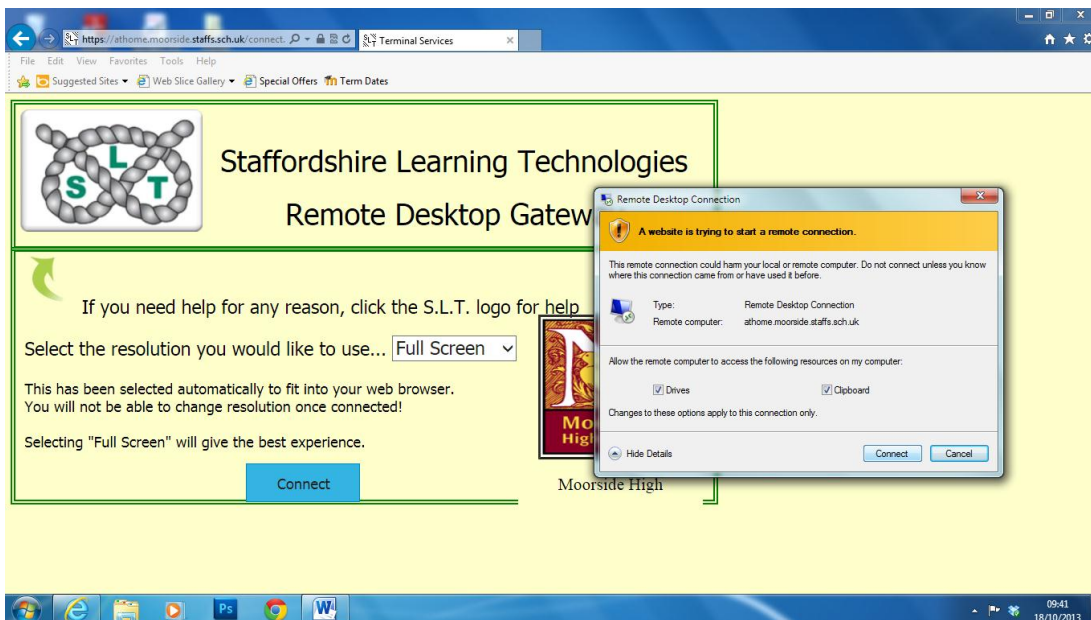

At the next screen click add to add the address of the Terminal server and Close. Then apply.

Internet explorer 11 users will need to enable compatibility mode for remote access, open Internet Options and choose Compatibility mode.

Choose Full Screen on the Staffordshire Learning Technologies Remote Desktop Page and Click Connect.

A Remote Desktop Connection Box will appear, Tick Drives and Clipboard and click Connect.

You will now see the log on screen for the Terminal Server, log on using your Curriculum Network Username and Password.

The first time you log on you will need to choose a Location for mapped drives and printers, choose a location and tick Default to this Location at next Logon.
